Midland Suburban Electrification

Bedford – Luton – St. Albans – St. Pancras – Moorgate

The work on preparing the line between London and Bedford, for electrification, which is due for completion in 1982, is now well under way and running to scheduled programme which will continue throughout 1980/1. This work includes the erection of overhead line equipment, renewing signal equipment, which will be controlled from a new power signal box at West Hampstead, improvements in the track to allow for higher speeds, increased clearances under bridges, improved train maintenance facilities at Bedford and Cricklewood and modernisation of some Station buildings. Allowance for this work has been made in the timetable, but day to day variations in locality of the work, and to cover a major item could cause delays in addition to this, particularly at weekends, and these will be advertised locally nearer the time. Every effort will be made to keep delays to a minimum.

Passengers are asked to take particular care at stations where platform alterations are in progress, and to travel in the correct part of the trains where platforms have been temporarily shortened.

British Rail apologises for any inconvenience caused while this work is in progress.

Kentish Town – Barking Service

The service between Kentish Town and Upper Holloway may be withdrawn during the currency of the timetable, in which event appropriate notice will be given.
